

- **Full service:** IMSM offers full implementation; we will produce the manuals and make the process as simple as possible by improving the systems already in place.
- **Training:** IMSM offer training to supplement your ISO; training with IMSM is flexible and delivered by experienced IMSM Trainers.

What is involved?

- Our Consultant will perform a Gap Analysis which acts as the initial step in the review of your company's internal processes and practices or management systems, where applicable, to determine where your company is today in relation to achieving the standard.
- If required, IMSM will develop and deliver tailored training programmes for your staff to supplement your ISO certification. This ensures a full understanding and implementation of the quality controls being put in place.
- The external audit is the monitoring of your company's conformance to the ISO standard. IMSM will continually support your business through the aforementioned stages as well as leading up to the audit, offering support and guidance to conformity.

- Once confirmed as being compliant, your organisation will be submitted to the certifying body deemed suitable. Upon successful completion of the audit, your organisation will receive the ISO certification.

Related Services

Beyond the Environmental Management System of ISO 14001, IMSM also recommend to your business the following management system standards:

- ISO 9001 Quality Management
- BS OHSAS 18001 Occupational Health and Safety ManagementIS
- ISO 22301 Business Continuity

These standards are designed to be compatible with ISO 14001; and can be integrated to deliver audit efficiency, consistency and optimisation. To explore the ways ISO standards can help to improve your business, contact IMSM today for an informal discussion with your local IMSM Area Manager.

Environmental Management Systems

ISO 14001

Business Challenge

Your company's outward projection can be enhanced by demonstrating care for the environment with the help of proven green credentials. The appropriate management of environmental issues contributes positively to costs savings and gives a company competitive edge. Increasingly, many organisations will only consider doing business with a company that can demonstrate its own responsible approach to the environment.

Business Solution

ISO 14001 Environmental Management will reduce your waste and give you a smaller carbon footprint; it will also assist in reducing your tax, energy and insurance bills and lower your environmental liability. Join the increasing number of businesses today, demonstrating their commitment to the environment by implementing actions towards compliance throughout your operations.

What is ISO 14001?

ISO 14001 is applicable to any size or type of organisation and specifies the requirements for the formulation and maintenance of an Environmental Management System (EMS).

ISO 14001 will help your company to reduce its carbon footprint and lower costs. This international standard will allow your company to set up a fully integrated and effective EMS that will streamline operations, allocate time and resources more effectively and increase overall efficiency.

Based on the Plan-Do-Check-Act cycle, ISO 14001 can be used as a tool; it focuses on identifying, controlling and monitoring the environmental aspects of your organisation and how to manage and improve the whole system.

What are the key benefits to your business?

- **Supply chain advantage:** Demonstrate your environmental commitment to clients that take an active interest in the environmental performance and credentials of their suppliers.
- **Increasing sales opportunities:** Enhance your business' ability to win contracts with proven credentials.
- **Financial improvement and savings:** Identify, implement and maintain efficiencies and cost reductions.
- **Enhanced company image:** Improve relations and provide assurance for clients, investors and local community.

- **Reduce risk:** Prevent incidents such as pollution releases and clean-up costs, as well as non-compliance with legislation and subsequent prosecution.

Why choose IMSM?

The IMSM approach is based on a key set of principles in order to create balanced and sustained results for our clients:

- **Fixed fee:** ISO implementation with IMSM is priced at a fixed rate from day one. No hidden charges, no unexpected invoices.
- **Flexible implementation:** Implementation is designed to fit around your business requirement and schedule.
- **Expertise:** All IMSM Consultants and Assessors have been successfully trained to the highest standard by an IRCA, or equivalent, approved training body and have earned a reputation of integrity for contributing value and best practice. IMSM guarantees that the Consultant and Assessor assigned to your organisation will be highly qualified and trained to assist your business to ISO certification.
