

From our Customers:

"Reaching these standards certainly helps when we are talking to international companies, particularly as the energy industry is very keen on environmental performance."

Great Yarmouth Port Authority

"ISO14001 brings us a distinct competitive advantage. We are a small business with the vision of continued and sustainable growth. We want to be viewed by our customers and our own suppliers as different and as a company that can help deliver service excellence and add value. IMSM/QAS are helping us to deliver this vision."

ABERDEEN FLUID SYSTEMS

"By achieving certification to ISO 14001, the company ensures they are in total control of all aspects of their own Environmental Management, and fully compliant with current legislation requirements. Achievement to ISO 14001 has enabled the company to promote environmental awareness to all employees and to monitor and improve environmental performance."

ISO 14001

Good for the Environment, Good for your Business

Practical Solutions

Our Qualified Assessors will:

- Examine your company's key activities in relation to best environmental practice
- help you to establish a program to deal with any areas that do not comply
- produce Policy and Procedures Manuals based on your business systems
- help your staff understand and implement effective environmental measures
- conduct a training program with your staff
- conduct an audit of your environmental systems to monitor conformance.

Once confirmed that your environmental policy and management systems are in place and the certification audit has been successfully completed, you will be awarded a QAS International certificate.

Environmental Management System From IMSM

Good for the environment, good for your business

ISO 14001 is an international standard which recognises the actions of responsible businesses in managing and controlling their environment. ISO 14001 Certification provides evidence that an Environmental Management System (EMS) is in place.

By implementing ISO 14001, your company can:

- Support key customers' own environmental policies
- Reduce wastage of raw materials and resources (energy, water, paper)
- Improve efficiency and motivation of staff
- Review and improve processes on an ongoing basis
- Avoid costly legislation and regulations
- Gain competitive advantage in your markets
- Enhance its reputation

What is the environment costing your company now?

- How much do you pay for waste disposal?
- Could you save on electricity, gas, oil, and water bills?
- Could you reduce or reuse packaging, paper, photocopying?
- Are you unwittingly breaking environmental regulations?
- Do your major customers already hold ISO 14001?
- Do your staff think about the environment in the workplace?
- Are you concerned about your business's carbon footprint?

If you answered "not sure" to 3 or more of the above questions, **call us now on +44(0)1666 826065** for a **FREE advisory meeting**.

International Standards are our Business

For more than 10 years, and with thousands of satisfied clients around the world, IMSM has worked with companies in both manufacturing and service sectors to help them achieve ISO standards. IMSM adds value by attracting new clients and improving efficiency, through quality (ISO 9001), information security (ISO27001), environmental (ISO 14001), health & safety (BS OHSAS 18001), and other management systems, providing a fixed fee, fixed timescale, integrated solution. You are guaranteed:

- IRCA qualified and experienced environmental assessors
- Fixed fee for better budgeting
- Smooth integration of own system
- No red tape or bureaucracy
- Potential savings through better working practices
- Consultancy help with documentation and manuals
