

IMSM guarantees that your Assessor will be highly qualified and trained to assist your business to ISO certification.

Full service: IMSM offers full implementation; we will produce the manuals and make the process as simple as possible by improving systems already in place.

Training: IMSM offer training to supplement your ISO; training with IMSM is flexible and delivered by experienced IMSM Trainers.

What is involved?

Our Assessor will examine your company's key activities and existing procedures and identify conformances to the ISO standard. You will be assisted in developing programmes to rectify areas of non-conformance and producing appropriate quality procedure manuals.

If required, IMSM will develop and deliver tailored training programmes for your staff to supplement your ISO certification, to ensure a full understanding and implementation of the quality controls being put in place, by way of employee development.

The external audit is the monitoring of the company's conformance to the ISO standard. IMSM will continually support your business through the aforementioned stages as well as leading up to the audit, offering support and guidance to conformity.

Once your organisation is confirmed as being ISO standard compliant, your organisation will

be submitted to the certifying body deemed suitable. Upon successful completion of the audit assessment process your organisation will then be awarded certification.

Related services

Beyond the Business Continuity Management System of ISO 22301, IMSM also recommend to your business the following management system standards to help develop and grow a profitable business:

- ISO 9001 Quality Management
- ISO 14001 Environmental Management
- BS OHSAS 18001 Occupational Health and Safety Management
- ISO 27001 Information and Data Security Management
- ISO 20000 Information Technology

These standards are designed to be compatible with ISO 22301 and can be integrated to deliver audit efficiency, consistency and optimisation.

To explore the ways ISO standards can help to improve your business, contact IMSM today for an informal discussion with your local IMSM Area Manager.

Business challenge

Unavoidable events such as natural disasters and technological incidents can critically impact businesses around the world, bringing their operations grinding to a halt. Recent global disasters have proven that businesses must go beyond relying on an emergency response plan and instead take adaptive and proactive measures to reduce the likelihood of disruption.

Business solution

Businesses of all sizes and types show sound business sense by engaging comprehensive and systematic processes of prevention, protection, preparedness and response for business continuity and recovery. ISO 22301 Societal Security - Business Continuity Management System (BCMS), a direct replacement of BS 25999, has been developed to help businesses minimise the risk of both major and minor disruptions.

What is ISO 22301?

ISO 22301 will help your business to implement a BCMS which specifies requirements to plan, establish, implement, operate, monitor, review, maintain and continually improve a documented system to prepare for, respond to and recover from disruptive events, when they arise.

Business Continuity Management provides a framework for building resilience and effective response by identifying potential threats to an organisation and their possible impact on business operations. This framework safeguards your reputation, profitability and the interests of key stakeholders.

ISO 22301 places emphasis on objective setting and monitoring performance, gives clearer expectations on management and requires careful planning and preparing the resources needed for business continuity.

What are the key benefits of ISO 22301?

- Effective response to crises.
- Protection of people.
- Protection of physical and knowledge assets of the business.
- Protect shareholder value.
- Reduced downtime.
- Improved operational effectiveness and resilience.
- Vital records can be maintained and protected.

- Compliance issues are identified and managed for alternative processes.
- Improved understanding of the business – risk identification and analysis.
- Preservation of markets by ensuring continuity of supply.
- Health and Safety implications are correctly considered – legislation adhered to.
- Improved overall security.

Why choose IMSM?

IMSM's approach is based on a set of principles to create balanced and sustained results for our clients:

Fixed fee: IMSM ISO implementation is priced at a fixed rate from day one. No hidden charges, no unexpected invoices.

Flexible implementation: Designed to fit around your business requirement and schedule.

Expertise: All IMSM Assessors have been successfully trained to the highest standard by an IRCA, or equivalent, approved training body and have earned a reputation of integrity.
