

IMPACT

MULTI STANDARD

ProLogic ITS designs and builds custom, industry-standard solutions to serve multiple technology platforms. By operating under a turnkey business model, ProLogic also provides value-added, end-to-end services such as warehousing, configuration, kitting, packing, logistics, and deployment. These services, leveraged by strategic ISO certifications, have allowed ProLogic tenure as a solution provider across the country.

Over the last 24 months, ProLogic has seen tremendous growth in both market share and revenue with its ISO strategy. This has allowed the company to acquire an impressive operating space of approximately 115,000 sq. ft. across multiple States. As the company continues to expand, executives are looking to diversify services into new markets, working towards the goal of being a true leader in the IT industry. Chris Crapps, Managing Partner for ProLogic, notes the importance of ISO certification for the company: "Being ISO certified sets us apart from our competition, and shows our customers that we operate at a higher standard. Over the years, IMSM has been a valued partner for maintaining our ISO certifications."

ProLogic currently upholds the ISO 9001 Quality Standard and selected IMSM as their partner, not only to obtain the certification, but as a trusted consultant for the ISO 14001 Environmental Standard, and ISO

45001 Health and Safety Standard Certifications. This ISO standard framework has provided a strong foundation for the company's scope and quality of services. ProLogic, often praised for attention to detail and professionalism, has experienced success with some of the largest, most complex customers throughout the Corporate, Retail, SLED, SMB, and Healthcare industry using these guidelines.

In compliance with ISO standards, ProLogic achieves the same level of customer satisfaction across its facilities, regardless of the project size and scope. Whether a client uses a ProLogic facility in the metro Atlanta area, or another across the country, they are guaranteed the same protections of efficient, comprehensive, and high-quality service.

ProLogic provides the elements needed and expected from a trusted source of IT products, professional services, and overall solutions. Due to its many years of experience, its professional staff, and its adherence to ISO standards, ProLogic is projected to see continued growth for years to come.
